

2024 - 2025

WHAT NEXT

CATALOG

Welcome to Future Port's “WHAT NEXT CATALOG” of resources and opportunities for students and teachers.

Future Port Youth 2024 was an explosion of ideas, inspirations, and practical advice on using the latest technology to positively impact the world. This compilation of news sources, books, study materials, and courses by our outstanding 2024 speakers and partners extends your journey beyond the conference.

Whether you are a **student eager to explore more or a teacher looking for resources to inspire the class**, this compilation is your essential companion.

HIGHLIGHTS of the 2024-2025 edition

↗ **AI-POWERED METAVERSE**
with recommendations by Alvin Wang Graylin, bestselling author of “Our Next Reality” and Global VP at HTC.

↗ **BECOMING NEXT SPACE GENERATION**
with tips from Jan Spratek, Space Enthusiast & Educator, ESA ambassador and ESERO coordinator.

↗ **HOW TO INVEST OR GET STARTUP SUPPORT IN THE CZECH REPUBLIC**
with recommendations from Czechinvest.

↗ **ADVANCES IN BRAIN-COMPUTER INTERFACE (BCI)**
with resources curated by Samay Lakhani, a BCI and AI researcher at Columbia University.

↗ **ADDRESS GLOBAL CHALLENGES BY DEVELOPING INNOVATIVE, IMPACT-DRIVEN VENTURES**
in a community of Moonshot Pirates.

↗ **LEARNING HOW YOU CAN BE PART OF DIGITAL TRANSFORMATION**
with ideas from Etnetera Group.

Explore, enjoy, and share!
Your Future Port Youth Team

Future of Education and Fashion Tech

by Linette Manuel

The future of education and fashion tech bridges art and science, with 3D printing at the forefront. This enables sustainable, innovative designs that combine creativity with advancements in material science. Embracing 3D printing unlocks new opportunities for students and designers, merging artistic expression with tech innovation.

Next Space Generation

by Jan Spratek

Space education inspires innovation by engaging students with real-world challenges like satellite operations and space-themed competitions. It highlights the importance of incorporating astronautics into education to develop critical thinking, collaboration, and curiosity. By fostering these skills, space education prepares the next generation to lead advancements in science and technology.

Riding the 10th Machine Age Wave Together

by Stephen Ibaraki

The "10th Machine Age" signifies a period of double-exponential innovation, driven by breakthroughs in supercomputing, quantum computing, chip technologies, biomedical advancements, and AI/ML. These innovations underscore an urgent call for global collaboration to harness their power for sustainability, equity, and ethical progress.

INNOVATION ECOSYSTEM BY THE CITY OF PRAGUE

List Curator

[City of Prague](#)

Web

[Link ↗](#)

Prague, the heart of Europe, is not only rich in history and breathtaking architecture, but also stands as a rising hub for technology and innovation where tradition and future converge seamlessly. Our vibrant city is home to a thriving start-up ecosystem, supported by some excellent research teams and institutions. Prague City Hall focuses its support to advancements, particularly in machine learning (AI), space and aerospace, biotech, green technologies, and creative industries.

Introduction To The Topic

Prague City Council understands that the city cannot thrive on history and culture alone. Prague aims to be a place, where past and future meet in lively and fruitful interaction.

Inspired by innovation activities as presented at the conferences around the world, Prague has been supporting the growth of its innovation ecosystem for the past decade and continues to step up this initiative.

A number of programs and hackathons have taken roots in Prague with the City's support aiming from practical aiming to uplifting creative thinking about present problems and seek for answers for current urgent topics and questions to enabling and easing up the connection and courtship between the research at one hand and innovative "start-up" community in the middle and the traditional industry at the other hand.

The City of Prague aims to establish a connection-friendly innovation ecosystem both for stake-holders and idea-bearers (like you, my dear creative friends ;o)).

The City of Prague tries to scout a set of proper places for all the phases of research-innovation-connection to production process, such as Science-Technology park Prague

Prague Innovation Marathon

Prague Innovation Marathon - This hackathon is currently in its fifth season. It generates and helps to develop innovative ideas for Prague. Some of the past seasons' ideas are already being implemented (Prague's ICT Operator undertakes implementation pilot tests of finalists' projects). High-school and university students not bound by stereotypes have been members of almost all participating teams in past and current runs of PIM.

Quite often, ideas and implementations are technology-based, and even the current run, which started in March 2024, promises to reveal a multitude of interesting ideas in areas aiming toward the connection of generations, circular economy, and other areas.

INNOVATION ECOSYSTEM BY THE CITY OF PRAGUE

List Curator
[City of Prague](#)

Web
[Link ↗](#)

The marathon is a good example of participation and cooperation of the **City of Prague** with a young generation and activating their interest in public affairs. The youth have an unbiased mind and are often able to come up with unorthodox and surprising solutions of various problems precisely because they are unencumbered with the “old ways of doing things” and “no-way stereotype”. They can provide us with the current and up-to-date view of the “future” city. Our aim is try to detect and deliver potentially fruitful ideas to pilot, and to bring them to probable realization with the common city practice.

DOING GOOD BETTER BY EFFECTIVE ALTRUISM

List Curator

[Effective Altruism Czechia](#)

Web

[Link ↗](#)

Effective altruism is a philosophy and a global movement of people committed to maximizing the positive impact of their time, efforts, and financial resources. By combining empathy with rational analysis, we aim to create a better world.

At its core, effective altruism relies on data-driven approaches and sound decision-making practices to determine the most effective ways to help others. These insights are then turned into actionable strategies.

EXCELLING IN PHYSICS BY FYKOS

List Curator
[Fykos](#)

Web
[Link ↗](#)

FYKOS is a group organizing competitions and other events in physics for high-school students based at the Faculty of Mathematics and Physics of Charles University in Prague. It has a rich 37-year history of organizing events that now host and inspire thousands of people from all over the globe, creating a community of young minds passionate about physics.

Introduction to the Topic

Fyziklani

The Main Events Of FYKOS Are:

- **Physics Brawl Online** – the largest online physics competition in the world which this year welcomed over 4000 participants from 63 countries all over the world
- **Fyziklani** – the largest in-person competition in physics in Europe with almost 1200 participants from 21 countries last year. It hosts a week-long accompanying program full of amazing science, and meets students from around the world.
- **FYKOS** correspondence competition, which happens online throughout the entire year and where you can find many intriguing physics problems (some very practical, such as how to put on a cap with one hand) and get individualized feedback on your solutions to help you improve your skills.

FYKOS also organizes many other scientific events in the Czech Republic, to learn more, visit the [website](#)

Opportunities

- Gain experience and improve your skills in physics while having fun...
- A supportive community of interesting people who love science from around the world that you can meet at the events of FYKOS.
- You might also learn about opportunities to study abroad or how to be a good scientist!

INVEST AND BUILD TECH STARTUPS IN CZECHIA BY CZECHINVEST

List Curator

CzechInvest

Web

[Link ↗](#)

Established in 1992, **CzechInvest** is a state contributory organization subordinate to the Ministry of Industry and Trade of the Czech Republic. It plays an important role in the area of business and investment promotion in Czechia. Thanks to regional, central and international presence, services cover the full range of needs of entrepreneurs, startups and investors. CzechInvest connects global trends with regional conditions to offer quality and tailored services.

CzechInvest helps all over the world to develop the potential of Czech technology companies, to support "smart" investments, the start-up and spin-off environment and, last but not least, to help Czech companies enter foreign markets or to promote the Czech economy, technologies and R&D abroad. CzechInvest actively organises events, hackathons and meetups to connect key players with the business ecosystem and foster entrepreneurship across Czechia.
