

WHAT NEXT CATALOG

2023 - 2024

Welcome to Future Port's "What Next Catalog 23/24" packed with knowledge and opportunities on the hot topics of tomorrow.

This compilation, brought to you by the excellent Future Port Youth 2023 speakers and partners, is designed to extend your journey beyond the conference. Inside, you will find a treasure trove of trusted news sources, books, study materials, courses, and more meticulously selected to deepen your understanding of the topics covered.

Whether you are a student eager to explore new horizons or a teacher looking for resources to inspire your classroom, this catalog is your essential companion for continued learning and discovery. Dive in and discover what's next!

In WNC 23/24 you will find these and much more:

↗ EXPLORE BRAIN-COMPUTER INTERFACE (BCI) TECHNOLOGY

Delve into the revolutionary world of brain-computer interface (bci) with resources curated by samay lakhani, a bci researcher from columbia university.

↗ SUSTAINABLE FOOD PRODUCTION

Learn about producing meat without harming animals or the planet, guided by Roman Lauš, the founder of [Mewery.io](#).

↗ MOONSHOT THINKING FOR ENTREPRENEURS

Marko Londa, founder of Moonshot Pirates, encourages students and entrepreneurs to think big and innovative.

↗ RAINFELLOWS provide recommendations on building thriving organizations and fostering natural group dynamics, drawing from organizational psychology and leadership coaching.

↗ EFFECTIVE ALTRUISM CZECH REPUBLIC focuses on making impactful career choices and help students and professionals prioritize actions that make a significant positive difference in the world.

↗ PRAGUE'S INNOVATION ECOSYSTEM highlight programs and opportunities for students and entrepreneurs to engage in innovative projects, technological advancements, and sustainable development within the city.

INNOVATION ECOSYSTEM BY THE CITY OF PRAGUE

List Curator
City of Prague

Web
[Link ↗](#)

- Prague, the heart of Europe, is not only rich in history and breathtaking architecture, but also stands as a rising hub for technology and innovation where tradition and future converge seamlessly. Our vibrant city is home to a thriving start-up ecosystem, supported by some excellent research teams and institutions. Prague City Hall focuses its support to advancements, particularly in machine learning (AI), space and aerospace, biotech, green technologies, and creative industries.

Introduction To The Topic

Prague City Council understands that the city cannot thrive on history and culture alone. Prague aims to be a place, where past and future meet in lively and fruitful interaction.

Inspired by innovation activities as presented at the conferences around the world, Prague has been supporting the growth of its innovation ecosystem for the past decade and continues to step up this initiative.

A number of programs and hackathons have taken roots in Prague with the City's support aiming from practical aiming to uplifting creative thinking about present problems and seek for answers for current urgent topics and questions to enabling and easing up the connection and courtship between the research at one hand and innovative "start-up" community in the middle and the traditional industry at the other hand.

The City of Prague aims to establish a connection-friendly innovation ecosystem both for stake-holders and idea-bearers (i.e. you, my dear creative friends ;o)).

Prague Innovation Marathon

Prague Innovation Marathon - This hackathon is currently in its fifth season. It generates and helps to develop innovative ideas for Prague. Some of the past seasons' ideas are already being implemented (Prague's ICT Operator undertakes implementation pilot tests of finalists' projects). High-school and university students not bound by stereotypes have been members of almost all participating teams in past and current runs of PIM.

Quite often, ideas and implementations are technology-based, and even the current run, which started in March 2024, promises to reveal a multitude of interesting ideas in areas aiming toward the connection of generations, circular economy, and other areas.

INNOVATION ECOSYSTEM BY THE CITY OF PRAGUE

List Curator
City of Prague

Web
[Link ↗](#)

The marathon is a good example of participation and cooperation of the **City of Prague** with a young generation and activating their interest in public affairs. The youth have an unbiased mind and are often able to come up with unorthodox and surprising solutions of various problems precisely because they are unencumbered with the “old ways of doing things” and “no-way stereotype”. They can provide us with the current and up-to-date view of the “future” city. Our aim is try to detect and deliver potentially fruitful ideas to pilot, and to bring them to probable realization with the common city practice.

[Link ↗](#)

Addressing challenges of the present.
Reshaping organizations for the future.
Developing the leaders who make it happen.

Introduction To The Topic

In these ever-changing times companies need to be able to respond quickly to future challenges. Because of the high level of competition and quickly changing markets, companies need to improve performance and impact of their company performance and impact while staying customer-centric and better understand customers' needs. We believe that every organization needs to find its own path. Whether it's big organizational transformation - individual personal development or coaching, our job is to help those companies reach their goals and be the guides on the often tough path ahead for them.

Partner's Offer

RainFellows offer experiential **workshops** designed to improve team efficiency, boost leadership skills, and agile methodologies within a safe and engaging environment. The unique approach combines hands-on experiences with theoretical discussions, allowing participants to actively shape the workshops to fit their needs.

[Link ↗](#)

- We were founded in September 2022 with the aim of jointly streamlining and facilitating the preparation of the Czech Republic and its education system for a future in which the only certainty is change.
- A diverse group of actors - individuals, schools, non-profit organizations; entities with national, regional and international reach - are at the heart of the association.
- We advocate for a correct understanding of entrepreneurship as the ability to exploit opportunities and ideas and create value for others, whether financial, cultural or social. Its work basis on the values of collaboration, support, sharing, and open communication
- We are improving the path to entrepreneurship development in the Czech Republic.

Introduction To The Topic

We live in a rapidly changing society where it is essential that everyone has the capacity to act upon opportunities and ideas, to work with others, to manage dynamic careers and shape the future for the common good. To achieve these goals, we need people, teams and organizations with an entrepreneurial mindset, in every aspect of life.

The European Commission has developed EntreComp: the **European Entrepreneurship Competence Framework** as a reference framework to explain what is meant by an **entrepreneurial mindset**. In APČ we use this frame to describe and explain the need of supporting entrepreneurship development in the Czech Republic.

EXCELLING IN PHYSICS BY FYKOS

List Curator
Fykos

Web
[Link ↗](#)

FYKOS is a group organizing competitions and other events in physics for high-school students based at the Faculty of Mathematics and Physics of Charles University in Prague. It has a rich 37-year history of organizing events that now host and inspire thousands of people from all over the globe, creating a community of young minds passionate about physics.

Introduction To The Topic

Fyziklani

The Main Events Of FYKOS Are:

- **Physics Brawl Online** – the largest online physics competition in the world which this year welcomed over 4000 participants from 63 countries all over the world
- **Fyziklani** – the largest in-person competition in physics in Europe with almost 1200 participants from 21 countries last year. It hosts a week-long accompanying program full of amazing science, and meets students from around the world.
- **FYKOS** correspondence competition, which happens online throughout the entire year and where you can find many intriguing physics problems (some very practical, such as how to put on a cap with one hand) and get individualized feedback on your solutions to help you improve your skills.

FYKOS also organizes many other scientific events in the Czech Republic, to learn more, visit the [website](#)

Opportunities

- Gain experience and improve your skills in physics while having fun...
- A supportive community of interesting people who love science from around the world that you can meet at the events of FYKOS.
- You might also learn about opportunities to study abroad or how to be a good scientist!

PRACTICAL WORKSHOPS IN COMPANIES BY KAMDU

List Curator
Kamdu

Web
[Link ↗](#)

Kamdu is a space for inspiration and connecting young people who want to broaden their horizons and explore new educational opportunities based on their interests. Through practical workshops within companies and organizations, students have the chance to meet with leading experts - **Inspirators** - and explore the practical aspects of various fields.

Introduction To The Topic

We organize one-day workshops in companies and organizations, where students meet leading experts and discover the practice of various fields. A young person can choose from four areas: Business and Career, Communication and Arts, Social Change and World of the Future. They can choose the number of workshops according to how much they want to explore. We offer the opportunity to discover themselves thanks to coaching provided by internationally certified coaches from EMCC. Each participant gets 3 coaching sessions.

Partner's Recommendation

1. I can't think of any project that would offer such a huge range of topics, lectures and lecturers as KudyKampus. It completely met my expectations. Each of the workshops was different in something." - **Jakub Meyzr, participant**
2. Definitely try this. It is a great opportunity to learn new interesting information that is missing from the school curriculum, and it is also a space to find great action friends." - **Alžběta Klonfarová, participant**
3. Here, one will meet inspiring people who can show one's view of the world, bring new experiences and help one find what they actually want from life and direct them towards achieving their goals." - **Filip Marek, participant**

DOING GOOD BETTER BY EFFECTIVE ALTRUISM

List Curator

[Effective Altruism Czechia](#)

Web

[Link ↗](#)

- **Effective altruism** is a philosophy and global community of people who strive to maximize the positive impact of their work and money.
- Together, we are creating a better world using our hearts and reason.
- Effective altruism is about using data and good decision-making practices to figure out how to best benefit others. We then put these insights into practice.
- Traditional altruism is based on empathy and a desire to help others. Effective altruism adds rigorous scientific methods and rational reasoning to focus on what really works and what brings the most benefit.

Introduction To The Topic:

Effective Altruism

Partner's Offer

The Czech Association for Effective Altruism offers introductory seminars on effective altruism and AI safety, as well as workshops and discussions on building a career with impact, among various other topics. For more information, please visit our [website](#).

LEARNING AI BY AIGNOS

List Curator
Aignos

Web
[Link ↗](#)

- The Czech non-profit organization **Aignos** is dedicated to educational activities about AI; most frequently through workshops for schools, businesses, and the general public. We strive to build AI awareness "from the bottom" – through personal contact with individuals across all parts of society, regardless of age, experience, social group, or geographical location.
- We primarily approach the subject of AI from a user-citizen perspective (i.e., "what everyone should know about AI"). Among other things, we're part of a group of AI educational initiatives, and we collaborate actively with **Prg.ai**, AI dětem, the educational center Didaktikon, Kampus Hybernská, and other institutions and experts.

Introduction To The Topic

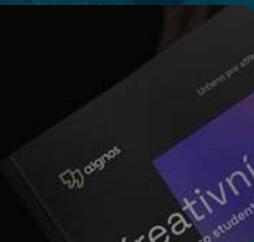

We believe that promoting AI literacy helps society to:

- 1) Better harness the positive potential of AI, and
- 2) Build greater resilience against AI risks or misleading/oversimplified information in the media and on social networks.
